A screenshot of a Microsoft Edge browser window showing the 'Citizens' dashboard. The title bar shows tabs for 'unified access mphasis - S' (closed), 'Unified Access' (active), 'Mail - Navya M1 - Outlook' (closed), 'Home - Mphasis - Webex' (closed), and 'Citizens' (active). The address bar displays 'localhost:8889/citizens'. The main content area features a header 'Citizens Dashboard' with navigation buttons for 'Citizens', 'Vaccination Centers', and 'Logout'. Below is a section titled 'Centers' with a table of citizen data. A blue button 'Add new Citizen' is located on the right. The table data is as follows:

ID	Name	City	Number of Doses	Vaccination Status	Vaccination Center	Action
1	kavya	chennai	1	Partially Vaccinated	gandhiji hospital	View Edit Delete
2	sowmya	chennai	2	Fully Vaccinated	government hospital	View Edit Delete
3	Pavitra	chennai	0	Not Vaccinated	Jawaharlal Nehru Hospital	View Edit Delete

At the bottom of the table, it says 'Total Citizens Found: 3'.

The screenshot shows the Postman application interface. On the left, there's a sidebar with 'My Workspace' containing 'Collections' (selected), 'Environments', and 'History'. Below it is a section titled 'Create a collection for your requests' with a 'Create Collection' button. The main workspace shows a collection named 'My first collection' with two nested folders: 'First folder inside collection' and 'Second folder inside collection', each containing several requests (GET, POST, PUT, DELETE). A specific request 'GET http://localhost:8889/citizens/api/citizens/3' is selected in the center panel. The 'Body' tab is active, showing an empty JSON object. The 'Body' tab also includes options for 'Params', 'Authorization', 'Headers (8)', 'Body' (selected), 'Pre-request Script', 'Tests', and 'Settings'. The 'Body' tab has a dropdown for 'Content Type' with 'JSON' selected. The response panel at the bottom shows a successful '200 OK' status with a response time of '140 ms' and a size of '303 B'. The response content is a JSON object representing a citizen:

```
2 "id": 3,
3   "name": "Pavitra",
4   "city": "chennai",
5   "numberOfDoses": 2,
6   "vaccinationStatus": "Fully Vaccinated",
7   "vaccinationCenter": "gandhi hospital"
```

The screenshot shows the Postman application interface. On the left, there's a sidebar with sections for 'Collections' (selected), 'Environments', 'History', and a button to 'Create a collection for your requests'. Below this is a 'Create Collection' button. The main workspace shows a collection named 'My Workspace' with two folders: 'First folder inside collection' and 'Second folder inside collection', each containing several requests. A modal window is open in the center, titled 'Overview', showing a GET request to 'http://localhost:8889/citizens/api/citizens/all'. The request details tab is selected, showing parameters, authorization, headers (with 'Body' selected), pre-request scripts, tests, and settings. The response tab shows a 200 OK status with a response time of 477 ms and a size of 878 B. The response body is displayed as JSON:

```
[{"id": 1, "name": "kavya", "city": "chennai", "numberOfDoses": 1, "vaccinationStatus": "Partially Vaccinated", "vaccinationCenter": "gandhiji hospital"}, {"id": 2, "name": "sowmya", "city": "chennai", "numberOfDoses": 2, "vaccinationStatus": "Fully Vaccinated", "vaccinationCenter": "Dr. Reddy's Hospital"}]
```

Create a collection for your requests

A collection lets you group related requests and easily set common authorization, tests, scripts, and variables for all requests in it.

Create Collection

Collections Environments History
